

SCC Meeting
November 10, 2015

Attendees: Jackie Mendonsa, Renee Richard, Jen Culbreth, Ann Shea and Debbie Lee

PARCC

Jackie shared results from the 2014-15 PARCC tests. She provided a brief overview of the data reflected on the report and explained how the Student Growth Percentage (SGP) is derived. She noted that students are measured against comparable cohort groups and achievement is assessed over time. It appeared that the results were weighed with MCAS.

Overall student performance in ELA is higher than Math.

The group discussed the need to *focus on the standards* in math and that the school's next step must evaluate curriculum materials against those standards.

A whole staff discussion will be initiated before investment in the next set of math materials is executed.

Safety Committee Update

Jackie shared an update regarding the Safety Committee's work to develop a plan that will address protocols and actions needed to reunite students and families in the event of a school-building evacuation.
